# ERASMUS+

Popa Matei

## First Impresion

- As an first impression, we were very surprised and frightened, not understanding Spanish and not knowing the education system here.
- But slowly we began to understand and to accommodate with all the factors, weather, places, language, food, etc.

My opinions of the two weeks spent in Granada and the ERASMUS + project

- My opinion on this trip is a very good one. We upgraded a lot of skills like communication, teamwork, English, and the most important one informatics.

- We had a very good time here, meeting new and interesting people and places.
  Learning a lot of new things and life matters.
- The weather was very nice, not too hot, not to chilly and it was perfect.

One of the most important sites that we made and my favourite is Personal Blog

### Football

Football is one of the most important thing in my life, or atleast was. Football was a place for me where I could find peace and I wanted to become one of the best, but I've learned that you don't need talent or money to get good, you need to have a powerfull and patient mind.

Even though I don't play football as much as I want to, it is still one of my biggest passion.

This hobby helped me improve my team spirit and communication skills and I am very thankfull that I have started playing these games.

### Gaming

Gaming was my first hobby, playing games since I was very little and for me, it was

Love Nature by Tyler Moore

### Gaming

Gaming was my first hobby, playing games since I was very little and for me, it was a place to hide all my problems. With time I started getting obsessed and addicted, and even though it helped me to go trough some tough times I needed to stop playing too much games before I would destroy my life. This hobby helped me learn some other languages, and helped me improve my english, computer skills and even communication skills.

### Going outside

Tell your visitor how your service can improve their life. Connect with the problem that they're trying to solve and address any objections you think they might have. What is the biggest benefit your customer will get from this? Keep your target audience in mind.

I am an 16 year old student at the Theoretical Highschool "Spiru-Haret" from a little city called Moinesti. I have 1,70 cm, a thinner body, two so called "beautiful" green eyes and a very hyperactive nature that attracts the attention of the people around me. I try to make as many friends as I can and I enjoy helping other people very much. Overall, the Erasmus+ Project will always be an unforgettable memory for

me.
